The Nordic Ergonomics and Human Factors Society (NES), founded in 1969, represents the professional interest of about 1400 members from the five Nordic countries. The aims of the NES are to promote collaboration between member organisations and individuals in the Nordic countries who have an interest in or are working with, ergonomics and the working environment and to facilitate the Nordic collaboration in international activities.

NES also increases and promotes knowledge about the interaction between humans and the environment in which they live and work and facilitates the use of that knowledge in the design of the environment, equipment and processes.

Objectives

For members, the Nordic Ergonomics and Human Factors Society signifies interest, skill, experience and credibility within the world of ergonomics and among other professionals.

Affiliation to the International Ergonomics Association (IEA) ensures strong international links between ergonomists throughout the world.

NES provides ergonomists and those interested in the subject with a focus for important matters affecting the profession. Through various participative committees and interest groups, the NES addresses current and long term issues affecting the professional status and the development of ergonomics, including education and practice.

The Nordic Ergonomics and Human Factors Society Conference, a major annual event, provides the opportunity for people to hear about, present and discuss topical issues to do with ergonomics and related disciplines. In addition to informative value, the NES Conference offers a strong social element and the chance to meet old and new colleagues. The conference language is English. The conference program includes the Annual General meeting of NES.

–Denis Coelho, President, Nordic Ergonomics and Human Factors Society (NES), 2022

Human Factors for AI & Work: A Lightning Talk (https://iea.cc/event/human-factors-for-ai-work-a-lightning-talk/)

SEPTEMBER 23, 2026

Human Factors for AI & Work:
A Lightning Talk
AI & Work Technical Committee
Save the Date: 23 September 2026
Join us at 12 pm UTC for a 60-minute session, hosted by the AI & Work Technical Committee.
Experts in Healthcare and Ethics
Four international leaders discuss AI in emergency care, patient safety governance, and auditing LLM bias.
Register for Free Today
Secure your spot for live Q&A interaction and the opportunity to receive a certificate of attendance.
Join the IEA for a cross-disciplinary snapshot of HFE-driven AI design.
